Project Plan: To Do List(Task Tracker)

The <u>Home Page</u> will contain the table of the tasks which includes the name of the task, description of the task, and a due date for the task. Users will be able to then update and/or delete the task. When the task has been completed, the user just has to delete the task.

The Home page will contain a Header that displays the *Home button, and Add Task button*. It will also display the content of the To Do list with each task and the information with it, below this would be an *Edit/Delete* button.

Clicking on the *Add Task/Edit* button will bring you to the object creation page where you can either modify existing information if you click *Edit* button and add new information if you click the *Add Task* button.
